

Sustainability Guide: Energy & Water Conservation

1. Energy Conservation Tips:

- Switch to LED bulbs to save 75% more energy.
- Unplug devices when not in use to avoid phantom loads.
- Use smart thermostats to optimize heating and cooling.

2. Water Saving Habits:

- Install low-flow showerheads.
- Fix leaking faucets immediately; one drip per second = 3000 gallons/year.
- Use rain barrels for garden watering.

3. Transportation Impact:

- Carpooling reduces emissions by 50% per person.
- Electric bikes are 10x more efficient than cars for short trips.
